

A microscopic view of a honeycomb, showing a grid of hexagonal cells. The cells are filled with a golden-yellow substance, likely honey, and are arranged in a pattern that tapers towards the top of the image. The background is a lighter, more diffuse yellow, suggesting a larger view of the honeycomb structure.

Sonnenblumenhonig

- **frisch geschleudert:** gelb bis gelbbraun, schnell kandierend
- **kandiert:** kräftiges Gelb
- **Geschmack:** stark, charakteristisch, mit angenehm säuerlichem Geschmack
